

Annual Report

2022-2023

"Farming is a profession of hope – the hope that the seed put into the ground will grow to become a bountiful harvest."

Barbara Ward

Avtar Singh Negi
Founder Secretary

Message from the Chairperson

This year, we acknowledge the resilience and strength of the non-profit sector as it reflects and fights back the collective trauma caused by the relentless waves of the pandemic. MVDA, in its 28 years of experience with mountain communities, has lived the journey of constant risks, resilience, and adaptability. The annual report for this year also sheds light on the shifting trends, new problems, and adaptive developments and innovations within this delicate ecosystem.

Despite the challenges, we have tirelessly worked to foster hope and nurture a sense of unity among the communities we work with. Together, they have collaborated to develop innovative solutions, empowering and uplifting those in need. MVDA, with help from different partners, was able to provide emergency health and dry ration kit support to the migrant workers, front-line workers in the community.

We have seen the most severe effects of unpredictable weather cycles : higher temperatures, unpredictable rainfall that causes floods and droughts, unexpected snowfall that causes pest and disease outbreaks, degraded forests, and consequently agricultural destruction by wild animals. To tackle these challenges, we focused on the introduction of new technologies, a climate-resilient variety of seeds, better-designed irrigation schemes, decentralized processing units, and efficient storage spaces. Moreover, a network of cluster federations and farmer-producer organization ensure a continuous market connection for increased production, creating an overall safety net for the farmers by managing risks and optimizing incomes. With rural women as the main stakeholders and partners in development, MVDA has observed an increase in women's social standing, aspiration, and representation in mountain communities. The organization envisions adopting an integrated, technology-led, and innovation-led approach to create more holistic and sustainable interventions for development.

I am happy to be part of this journey with MVDA and congratulate the team for our collective achievements this year!

ABOUT MVDA

Mount Valley Development Association (MVDA) is a civil society organization that has been working in the fields of agriculture, education, livelihoods, and sustainable development since 1995. More than 80,000+ individuals from Uttarakhand, Uttar Pradesh and Punjab are associated with the MVDA. Along with that, we also focus on building climate-resilient approaches, the formation and strengthening of CBOs, linkage with government schemes and entitlements, and the dissemination of best practices from the field aiming for holistic rural development. MVDA has collectivized 2,500 farmers and successfully established 6 Swayat Sahkarita (Cooperatives).

VISION

Our vision is to be a catalyst of change by supporting the local communities toward the eradication of poverty through sustainable livelihood initiatives and the creation of a society firmly rooted in the principles of social harmony, justice, and solidarity.

MISSION

To improve the quality of life of rural people, especially women and the underprivileged section of society in the villages of Uttarakhand. fulfillment of our goals through interventions in education, environment & livelihood.

OUR GOALS

01 Empower women and underprivileged communities with sustainable livelihood opportunities to eradicate poverty.

02 Enhance access to quality education for children and adults in the Himalayan region, fostering knowledge and skills for a better future.

03 Promote inclusivity, social harmony, and justice by addressing social issues and fostering solidarity in communities.

04 Empower women, adolescent girls, and youth through education and awareness about health hygiene and capacitate them to make informed decisions about their well-being and the well-being of their families.

05 Fostering collaboration and coordination among community-based institutions, local government functionaries, and Non-Governmental Organizations to implement programs.

MVDA is working towards the achievement of 10 Sustainable Development Goals

WHO WE WORK WITH : OUR RIGHTS HOLDERS

MVDA is committed to serving right holders that come from economically disadvantaged backgrounds, including poor, deprived, vulnerable, and marginalized individuals. Our focus extends to all in the community, irrespective of their gender, caste, and religion. This inclusive approach encompasses both rural and urban areas, ensuring that our services and programs reach those in need across various regions.

We strongly emphasize empowering women and youth. Recognizing the unique challenges faced by women, we strive to provide them with opportunities for skill development, education, and economic independence. Simultaneously, we prioritize the needs of the youth, equipping them with the necessary tools and resources to shape a brighter future for themselves and the communities.

The Cluster-Based Integrated
Rural Development
Programme (CBIRD)

Climate Resilience and Agriculture

To develop the adaptive capacity of communities to overcome climate-related disruptions and shocks and to sustain and improve their livelihoods. Community resilience to climate shocks is developed based on the diversification of income sources, integrating cross-cutting themes such as sustainable water management, organic food production, and biodiversity conservation.

Key Components

- Cluster-based natural farming and community resilience
- Soil & water conservation
- Use of agronomical practices and cropping pattern
- Promotion of local landraces and seed conservation
- Promotion of climate-resilient varieties
- Environmental awareness and agriculture based traditional knowledge
- Value addition of agri and forest-based products
- Climate change, clean energy, green entrepreneurship and disaster resilience

OBJECTIVES

- Promote sustainable farming techniques that reduce greenhouse gas emissions, rejuvenate water resources and enhance soil health. Encourage the use of natural farming methods, agroforestry, crop rotation, and integrated pest management to increase productivity and resilience.
- Enhance water conservation and management practices through the promotion of efficient irrigation systems, rainwater harvesting, and water storage infrastructure.
- Encourage farmers to diversify their agricultural production by cultivation of various crop varieties to mitigate climate risk.
- Promotion of climate-resilient and nutritious indigenous landraces of the crop with high market value with eco-friendly methods for quality production encourages climate-resilient practices.
- Establish and Strengthen of Village Level Climate Risk Management Committee (VCRMC)
- Adoption and dissemination Over and above 40% of total farmers use climate-resilient technologies, such as drought-resistant seeds, improved storage facilities, and energy-efficient equipment. Provide support to farmers in accessing these technologies through financial incentives or technical assistance.

HIGHLIGHTS

- 1348 farmers adopted sustainable practices, including IPM, IPNM, and organic farming across 38 project villages.
- 11 women farmers groups formed, fostering community and collaboration among farmers.
- Established 24 Farmer's Field Schools to acquire knowledge, learning and sharing.
- Developed 5 vegetable nurseries resulting in enhanced vegetable production and productivity.
- 67 women actively utilized cooperatives, contributing significantly to their family finances.
- Successfully raised awareness among 786 participants, highlighting initiatives like selecting Farmer's Field Schools and inspiring community-driven shramdaan (voluntary labor).
- 339 women engaged in sustainable millet cultivation and seed production.
- 1500 farmers sold agricultural produce to Umang Swayat Sahakarita for value addition and the marketing.
- Established 16 Village Level Climate Risk Management Committees, addressing challenges like forest fires and waste management.
- Installed community dustbins in 20 villages, promoting cleanliness and environmental well-being.

Knowledge Building and Information Dissemination

Our strategy for developing knowledge involves enhancing and extending existing initiatives and best practices through collaborative efforts with like-minded partner organizations. We have developed and disseminated practical knowledge about what works in a variety of contexts and what is essential to support fragile Himalayan ecology and indigenous agriculture best practices for sustainable livelihood.

Learning objectives

Seed Storage basics

Key Components

- Shared learning through various guides/ manuals and toolkits
- Context-based solution
- Engagement with other stakeholders, line departments & peer NGOs
- Thematic workshops, webinars, and seminars on issues of interest to members
- Protection and conservation of indigenous best practices by dialogues and documentation.

- Developing and disseminating practical knowledge on the best practices of local knowledge in diverse contexts which involves creating guides, manuals, and toolkits that offer valuable insights and actionable strategies.
- Establish platforms and channels for knowledge sharing and resources with relevant stakeholders, including governments, NGOs, community leaders, and policymakers. Through engagement with stakeholders, line departments, and peer NGOs, the organization aims to foster collaboration and cooperation in strengthening knowledge at a broader scale.

OBJECTIVES

- Organize thematic workshops, webinars, and seminars on topics of interest to members, facilitating the exchange of ideas and experiences.
- Protect and conserve indigenous knowledge and practices through dialogues that involve local communities. Ensure that traditional knowledge is respected, valued, and integrated for sustainable livelihood and climate resilience.

HIGHLIGHTS

- 10 wall paintings were made as a dynamic means of actively promoting awareness about social matters focused on health, hygiene, girl-child education, and menstrual hygiene in 10 villages.
- 71 farmers participated in awareness programs focused on government schemes like ATMA, social security, farm machinery bank etc. with the aim to spread awareness and entitlement about the govt. schemes & benefits.
- Developed multiple modules to collaborate with the society and thrive mutual understanding. These modules cover topics such as gender education, menstrual health, and hygiene management, water sanitation and cleanliness.

Skill Enhancement and Sustainable Livelihood

Skill development and vocational education such as computer science, retail management, sewing machine operation, beauty and wellness, and micro-entrepreneurship to the women and youth which helped them to get better job prospects. Skill development not only enhanced their skills but also helped them in securing sustainable livelihood. We aim to impart learners with required theoretical and practical knowledge.

Key Components

- Life skills training and enhancement of skill-based knowledge
- Creation of sustainable livelihoods and employment opportunities.
- Training in digital, and financial literacy
- Market scanning to understand recent trends
- Cross-learning and site visits
- Technical training for building entrepreneurial skills

OBJECTIVES

- Comprehensive assessment of the skills, resources, and potential economic opportunities available in the rural area. Identify the existing traditional knowledge that can be leveraged for sustainable livelihoods.
- Promoting entrepreneurship and supporting the establishment of micro-enterprises in rural areas.
- Provide training and mentorship programs that help individuals develop business plans.
- Supporting market linkages and value addition.
- Promote the formation of cooperatives and collective enterprises.

HIGHLIGHTS

- About 600 households received training in on farm and non-farm livelihoods in collaboration with expert institutes (KVKs, Agri-Horticulture department, forest department, animal husbandry department, etc.) 90+ households enhanced income and livelihood.
- Livelihood support was provided to 22 women through Umang Swayat Sahakarita cooperative engaging them in various job roles such as packaging, labeling, grading, and processing, where they were able to earn 4000-5000 per month and sustaining their livelihoods and annual employment.
- 3 Farmer Producer Organizations (FPOs) actively functional and equipped in 3 blocks to reduce production costs and improve market access.
- Established Upla Taknor Krishak Swayat Sahakarita, along with a processing unit, which aims to elevate farmers' income. Presently, 32 women are actively participating in diverse job roles.
- 25 women were trained on grading processing, grading & packaging of the raw material of Malta squash, turmeric pickle, rhododendron tea, Jam, etc.
- MVDA Participated in 2 International Year of the Millets program with the purpose of promoting nutritional security, sustainable agriculture, and the empowerment of smallholder farmers. Their engagement aimed to preserve cultural traditions, drive research and innovation, and enhance food security through community education and partnerships.
- Millet processing machine introduced in the processing unit aims to enhance millet production & processing.

Training and Capacity Building

Empowering mountain communities and ecosystems for sustainable development requires a strategic focus on fostering the leadership capabilities of women and youth. To achieve this, we aim to implement an effective perceptual development training program. To equip women and youth with the necessary skills, knowledge, and attitudes to become influential leaders in their communities, driving positive change and promoting sustainability.

Key Components

- Focus on gender and youth
- Empowerment and self-efficacy
- Sustainability of community-based interventions
- Training of Trainers (ToTs)
- Community-level women's digital literacy
- Equipping with required skillset

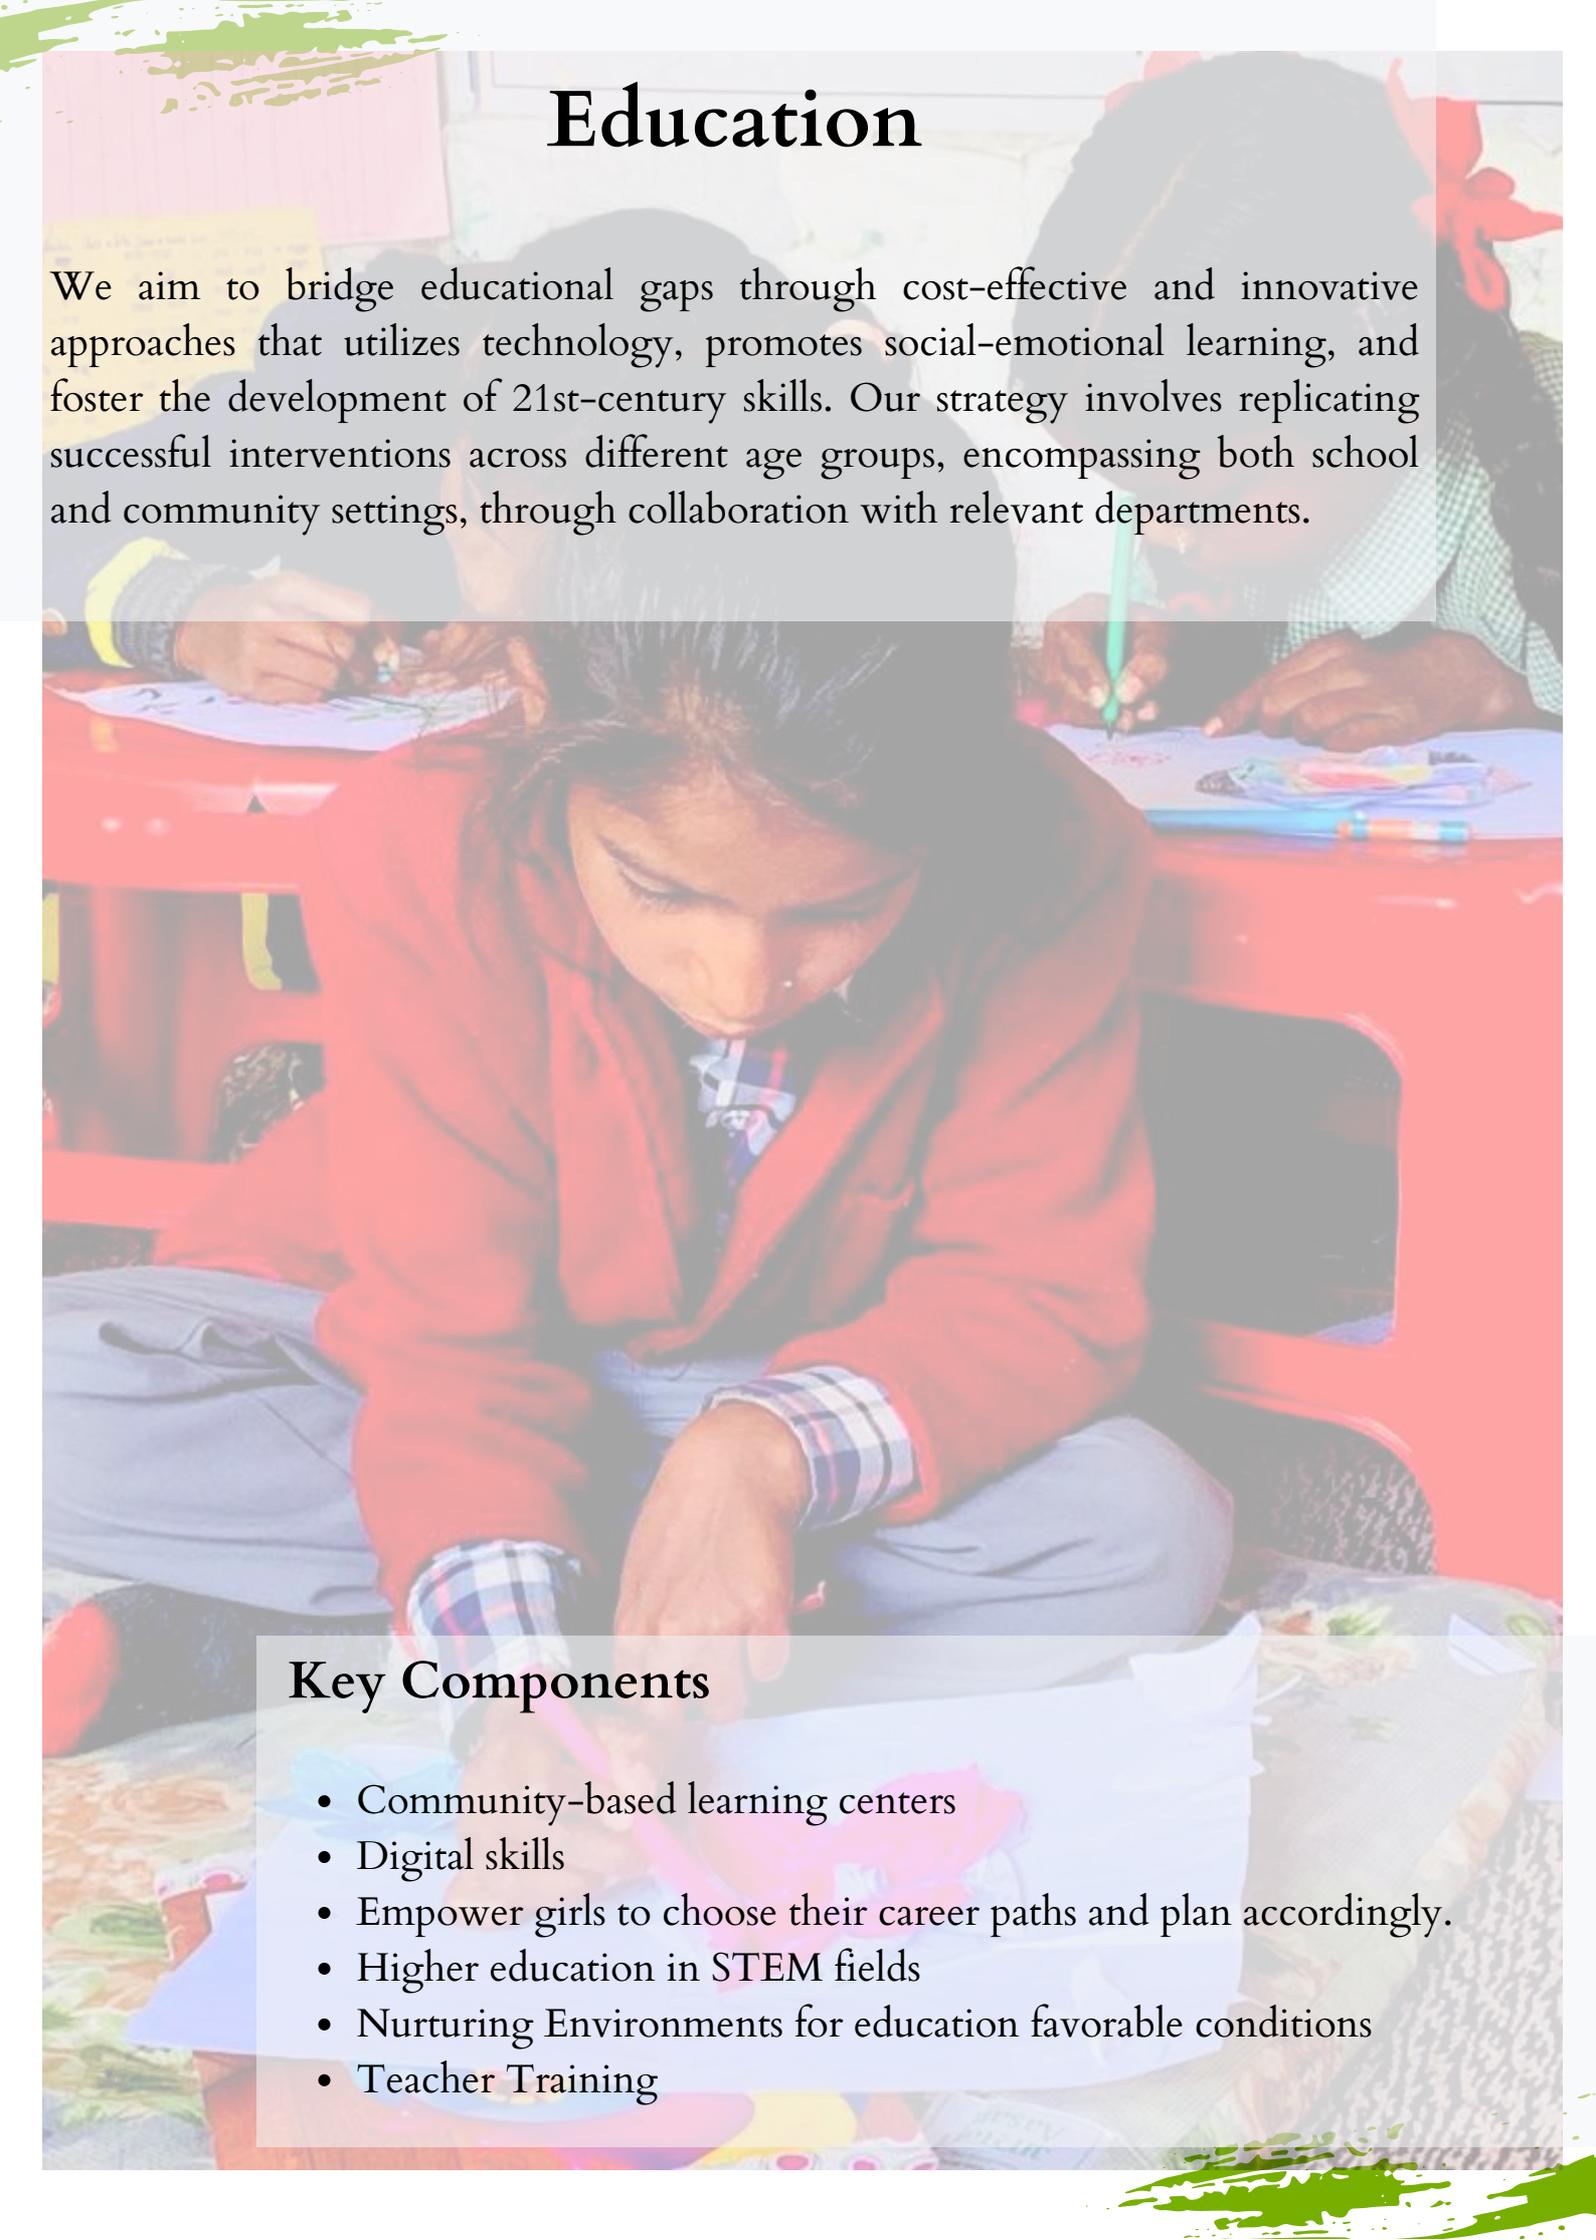

OBJECTIVES

- Develop and implement training modules focused on leadership skills, communication, conflict resolution, and decision-making tailored specifically for women and youth in Himalayan communities.
- Incorporate modules that emphasize the importance of environmental conservation and sustainable practices into the training program.
- Empower women and youth with entrepreneurship training, emphasizing innovative and sustainable business practices.
- Facilitate networking sessions and community-building activities to foster collaboration and teamwork among participants. Creating a platform for exchanging ideas, experiences, and best practices to empower women and youth to work together in addressing community challenges.

HIGHLIGHTS

- Trained 24 women in Community Leadership with a goal to create awareness & capacity building of youth which will guide them to emerge as Effective Leaders
- Empowered a group of 24 women through 'Haqdarshak' training, cultivating a dedicated team to facilitate community access to government schemes.
- 547 women participated in Menstrual Health Management (MHM) Training.
- The MVDA team participated in community seed bank training. The training covered community seed bank establishment seed preservation, collection, documentation, and community engagement, promoting biodiversity conservation and sustainable access to plant genetic resources.
- 114 participants participated in training on wash to develop awareness about JAL, JEEVAN mission, and awareness about increasing the quality of water and reducing risk to human health.
- 65 participants participated in capacity-building training on Bal Panchayat.
- MVDA team participated in the Kisan Swaraj Samellan program focused on farm discussions, workshops, and sessions. Experts shared insights on climate resilience, organic farming, empowering marginalized farmers, and build an understanding of the post-harvest technology of millet.

Education

We aim to bridge educational gaps through cost-effective and innovative approaches that utilizes technology, promotes social-emotional learning, and foster the development of 21st-century skills. Our strategy involves replicating successful interventions across different age groups, encompassing both school and community settings, through collaboration with relevant departments.

Key Components

- Community-based learning centers
- Digital skills
- Empower girls to choose their career paths and plan accordingly.
- Higher education in STEM fields
- Nurturing Environments for education favorable conditions
- Teacher Training

OBJECTIVES

- Establish and support community-based learning centers that provide accessible and inclusive education for all individuals, regardless of their backgrounds or circumstances.
- Develop and promote digital skills training programs to equip individuals with the necessary knowledge and abilities to thrive in the digital era and participate in the modern workforce.
- Enable girls to choose their careers and chart pathways by providing mentorship, guidance, and resources that empowers them to make informed decisions and pursue their professional goals.
- Increased participation and enrollment of individuals, especially women, in higher education programs related to science, technology, engineering, and mathematics (STEM) fields, ensuring equal opportunities for all.
- Encourage the integration of sports and life skills development programs into educational curricula, fostering physical well-being, teamwork, leadership, and resilience among students.
- Enhance teacher training programs to equip educators with the knowledge, skills, and innovative teaching methods necessary to deliver high-quality education and foster student engagement and achievement.

HIGHLIGHTS

- Provided joyful education to 4500 girls through the introduction of varied Academic Kits, enriching their learning with engaging educational materials.
- Conducted 24 academic training sessions for 147 teachers.
- 1,000 girls have been empowered with life skills such as leadership, communication, creativity, and critical thinking
- 700 primary and senior secondary students now benefit from accessible quality education.
- Implemented smart classrooms, and library and provided sports kits to ensure holistic student development in the project area.
- 72 village-level School Management Committee meetings were held to ensure engagement, capacitate, and activation of the school in the project area.

Health, Sanitation and Nutrition

To educate community members about healthy lifestyles & habits and support them with facilities such as clean drinking water. Our focus is also on promoting nutrition to reduce anemia, especially among adolescent girls and pregnant women, while working with government and like-minded organizations to raise awareness of physical and mental health.

Key Components

- Safe drinking water-hand hygiene in schools & community
- health & nutrition
- Improve sanitation facilities
- Menstrual health management
- Promoting personal health and hygiene practices
- Empowering and strengthening community health workers
- Capacitating local health centers

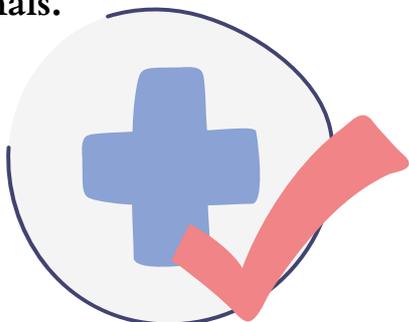

- Establishment of support services such as counseling centers to address the health needs of community members and resources, information, and assistance related to menstrual health, including access to menstrual hygiene products.

OBJECTIVES

- Organize awareness programs to educate community members about the importance of healthy lifestyles and habits. These sessions should cover topics such as balanced nutrition, anemia prevention, menstrual health physical fitness and mental health.
- Promotion of nutrition and anemia prevention & awareness about the importance of a balanced diet and its impact on overall health particularly among adolescent girls and women. Conduct nutritional assessments, distribute educational materials, and organize and showcase nutritious meal options.

HIGHLIGHTS

- Organized health camps to improve community health check-ups. In these camps, more than 1000 individuals were diagnosed, helping to promote better healthcare awareness and accessibility within the community.
- Organized 4 animal health camps in which 2000 cattle rearers participated in camps and provided primary health care and medicines to the cattle rearers to enhance their ability to diagnose and care for their animals.
- 30 toilets were constructed in rural community for 30 right holders to improve sanitation facilities. This effort aimed to enhance the overall hygiene and well-being of the community members.
- ASHA workers, Anganwadi Workers, Health Workers, and SMC members were trained to promote better hygiene and sanitation practices.
- Menstrual hygiene awareness drive/campaign was conducted in 34 remote area villages. 547 women and adolescent girls participated in the campaign and menstrual cups were also distributed to them under the initiative.

Women Empowerment and Gender Mainstreaming

To create a gender-sensitive society where all genders can leverage their rights to the fullest and reach their maximum potential. The initial identification of issues and problems across all areas of the activity is such that gender differences and disparities can be diagnosed.

Key Components

- Establishing an adequate accountability mechanism for monitoring progress
- Identification of the issue and neutralizing the problem from a gender equality perspective
- Gender analysis
- Equitable Participation at all levels of decision-making

OBJECTIVES

- To promote women's leadership, diverse representation, and inclusive decision-making to contribute to holistic development for stronger communities
- To raise awareness about gender related issues & advocate for changes in behaviour to stand against gender inequalities
- To provide women with equal access to resources, such as education, healthcare, and economic opportunities
- To create programs and initiatives that provide women with the necessary skills, resources, and support to start and manage their own businesses or income-generating activities

HIGHLIGHTS

- 3 progressive farmers & 2 Women Farmers Groups were rewarded with an appreciation letter by the organization for adopting and replicating new farming techniques.
- Economically & socially empowering 231 women farmers through different dialogue and decision-making processes.
- 62 youth cadre were trained in leadership and decision-making with a special focus on menstrual health awareness with the aim to encourage open discussions about menstruation, especially within Self-Help Groups (SHGs) to empower and educate the members.
- 11 new WFGs formed with 230 members, fostering collectivisation and strengthening local communities through capacity building to enhance their skills and gaining economic empowerment by participating effectively in the market ecosystem.
- 58 women right holders enabled to set up small-scale businesses. (Kirana shops, Tailoring, fruit processing unit, Knitting, grinding, etc.)

Collective Enterprises and Institutional Building

Organize the poor and marginalized people to invest in their leadership capacity at all levels by engaging them in micro-savings and microlending. Also, to bring the socio-political issues to a forum that act as a platform for creating and shaping developmental discourse, transforming them into entrepreneurs, and giving them economic empowerment. As a result, it is a methodical approach that enhances each component of the enterprise and ties them together to create a whole that is greater than some of its parts.

Key Components

- Organize small farmers groups into a federation.
- Developing and supporting women farmer collectives for business growth
- Market linkage through tie-up with buyers and supermarket.
- Promoting the green entrepreneurship model
- Sustained cooperative through profitable initiatives

OBJECTIVES

- To improve the economic livelihoods of small farmers by establishing a federation of farmer groups and supporting women and farmer collectives for business growth.
- To enhance market access and integration for small farmers by creating market linkages through collaboration with buyers and supermarkets.
- To promote environmentally sustainable practices in agriculture by encouraging the adoption of the green entrepreneurship model within the farming community.
- To ensure sustained cooperation and growth by implementing profitable initiatives and fostering collaborative partnerships among farmers and stakeholders in the agricultural value chain.

- 25 women from the community took part in a training program focused on empowering them with knowledge and skills to create sustainable products. This initiative promoted entrepreneurship among the members of Women Farmer Groups, leading to the establishment of small businesses.
- 7 women started producing various products (dhoop, sambrani cups, seeding pots, and decorative items) from herbs and cow dung.

HIGHLIGHTS

- The recently established fruit processing unit by the Upla Taknaur Krishak Utpadak Sangthan FPO in Jhala, Uttarkashi, achieved a total turnover of 2.35 lakhs.
- FPO established a Fruit Processing unit, with a daily production capacity of 16,000 kg.
- The Farmer Produce Organization (FPO) has initiated collaboration with farmers from 8 villages, and a total of 131 shareholders have become members of the FPO.
- Umang Swayat Sahakarita purchased agro-produced from about 1500 women Farmers.
- Promoted entrepreneurship model with Women Farmer Groups to reinforce through the income generation activity. 58 women started their own small business models and started generating employment through the support of various inputs of advanced sewing machines, general stores, power weeders for farmers' group members, cereal grinding machines, and knitting machines. Gradually, these members have also started generating income.

Convergence and Partnership

Collaboration and partnership are vital for holistic development, as they bring together diverse institutions and organizations to collectively address complex challenges. This approach leverages shared resources, expertise, and networks to enhance impact and drive positive change. By collaborating with NGOs, CBOs, academic and research institutions, CSR organizations, foundations, and knowledge-building organizations, our organization aims to build capacities and understanding on various topics. These partnerships enable our team to access technical expertise, expand outreach, localize initiatives, integrate research and evidence, secure sustainable funding, and promote continuous learning. Overall, embracing collaborative efforts facilitates innovative solutions and sustainable growth, contributing to the broader goal of achieving meaningful and lasting development.

प्रोसिएशन (टि.ग.)
ए इडिविजुअल रिलिफ

Key Components

- Collaborating with State and Central Ministries/Departments for synergistic efforts, both directly and indirectly
- Establishing linkages with Panchayati Raj Institutions (PRIs) and relevant block and district departments.
- Partnership with like-minded organizations, academic & research institutions
- Collaboration with CSR Foundation, Institutions, Grant Making Foundation, Trusts, and Individuals
- Collaboration with Knowledge partners

OBJECTIVES

- Foster effective collaboration with State and Central Ministries/Departments to enhance coordination and maximize resources for mutually beneficial initiatives.
- Strengthen partnerships with Panchayati Raj Institutions and block/district departments to facilitate grassroots-level engagement and implementation of projects for community development.
- Forge strategic alliances with like-minded organizations, academic & research institutions, CSR Foundations, Trusts, and Individuals to leverage expertise, resources, and innovative solutions.
- Establish and maintain collaborative ties with knowledge partners to promote knowledge-sharing, capacity-building, and continuous learning for sustainable development endeavors.

HIGHLIGHTS

- Collaborated with Genpact Better World Initiative (BWI) 8.0, for the end-to-end capacity building of the organization to ensure the data collection in an effective way.
- Partnered with BOOKLETPEDIA to develop a module on gender mainstreaming and mensuration for the capacity building of staff on conducting training at the village level.
- Collaborated with DIVINE PRO for capacity building of right holders on MHM (Mensuration Health Management) and right usage of mensural cups.
- Formed a partnership with the Indian Army Canteen to promote our range of Apple processing products. Additionally, we have joined forces with GNVN (Garhwal Mandal Vikas Nigam) to establish an exclusive showcase corner, highlighting Farmers' Producer Organization (FPO) products.
- Collaborated with Forest Department, Range Paukhal collaborated to strengthen the Village Level Climate Risk Management Committee to minimize the occurrence of the forest fire.
- Partnership with IIM Kashipur (Indian Institute of Management, Kashipur) through their Exponential Learning Program to bridge the gap between theory and ground realities while addressing societal needs effectively.

MVDA has also established a network and membership with the Uttarakhand State Coalition for Natural Farming, which aims to promote agroecology-based farming practices. Additionally, we actively participate in the Maintenance and Welfare of Parents and Senior Citizens committee, dedicated to providing effective provisions for the well-being of elderly citizens. Moreover, our involvement in the Committee on Primary Health Service focuses on advocating for a primary care-based healthcare delivery system.

Research & Community Development

Mount Valley Development Association (MVDA) is dedicated to enhancing agricultural practices and fostering community development. Through research, Farmer Field Schools, seed production, and innovative approaches, we empower farmers with sustainable techniques, modern technology, and collective cooperation for a prosperous agricultural landscape. Seed production is another crucial aspect of work. Recognizing the significance of high-quality seeds for crop yield and resilience, the organization promotes seed-saving practices and trains farmers in seed production techniques.

Key Components

- Community engagement and empowerment
- Effective publication and communication
- Research-driven approach
- Farmer field school
- Innovative technology
- Seed production and saving
- Sustainable approaches

OBJECTIVES

- To promote sustainable agricultural practices within local communities, focusing on resource-efficient and environmentally friendly techniques, leading to increased productivity, resilience, and food security.
- To empower farmers through farmer field schools and training programs, equipping them with knowledge and skills in modern agricultural practices, seed production, and conservation, fostering self-reliance and improved decision-making.
- To facilitate effective publication, communication, and knowledge exchange among stakeholders, including researchers, farmers, and policymakers, creating a collaborative network to share research findings, best practices, and innovative technologies for sustainable agricultural development.

HIGHLIGHTS

- 45 women farmers participated in seed multiplication and production techniques.
- 671 farmers participated in field trials with different innovative practices.
- A paper published in the Journal of Environment, Ecology, and Conservation.
- 2 articles published in an Agri Article Magazine.
- An abstract was Published in the souvenir of the 1st National Conference of Plant Genetic Resources and Management.
- MVDA & KVK Ranichauri team promoted millet varieties like Amaranth, Barnyard Millet & Finger Millet in about 20 villages, where trials of different researched varieties were demonstrated with farmers.

The Cluster-Based Integrated Rural Development Programme (CBIRD DP)

Demonstrate sophisticated models with strong socio-economic conditions and then replicate the successful models in a wide range of other areas. To bring a significant and sustainable transformation, we aim to assist underprivileged communities with alternative livelihoods which help them to cross the poverty line.

Key Components

- Natural resource management
- Poverty, hunger, and unemployment
- Sustainable farm and non-farm employment opportunities
- Food security
- Health, hygiene, and sanitation
- Safe drinking water
- Promotion of responsible tourism
- Pre-school non-formal education through leadership training and Bal Panchayats

OBJECTIVES

- Develop and deliver training programs to farmers, equipping them with modern agricultural techniques, water management practices, and sustainable farming methods to enhance productivity and reduce environmental impact.
- Foster a culture of entrepreneurship by providing training, and mentorship to aspiring entrepreneurs in both rural and urban areas, enabling them to establish sustainable farm and non-farm businesses.
- Conduct community-based awareness programs to educate people on the importance of health, hygiene, and sanitation practices, including the proper handling and storage of food and water.
- Establish and support preschool education centers, combining basic education with leadership training to foster cognitive development and empower young children.

HIGHLIGHTS

- Constructed eight chahal to protect and improve the quality of the water and other natural resources.
- 50 solar street lights are installed at different public places like markets, chowk, temples, etc. for community facilities.
- Enhanced the capacity of 649 farmers by providing training on the construction of trenches, ponds, and plantations in 19 villages with the initiative to empower them to take responsible actions for environmental conservation and protection.
- 4-hectare agricultural land which was mostly abandoned by the villagers is protected from wild animals by establishing fencing walls in the project area villages.
- Plantation of fodder (Napier grass) planted in 2 villages with 5 WFGs (Women Farmers Groups).

TRAINING, WORKSHOP, SESSION AND MEETING ATTENDED BY MVDA IN 2022-23

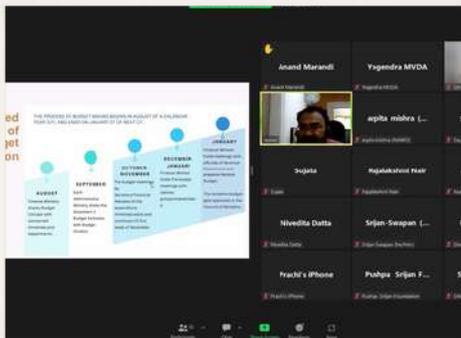

Why should I promote my NPO on Facebook?

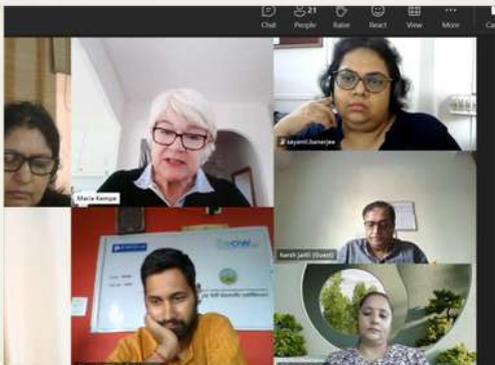

- Use Facebook for creating awareness for your causes and campaigns
- Use Polls and Feedback to gather information from your

SUCCESS STORY

AGAINST ALL ODDS

Manju Devi, a remarkable resilient woman, faced a daunting challenge when her husband tragically passed away, leaving her as the sole provider for her two young children. Undeterred, she fearlessly embraced her role as both mother and father. In the midst of her struggles, a trusted friend introduced her to Mount Valley Development Association (MVDA), a life-changing organization focused on empowerment.

Joining MVDA's processing unit began a transformative journey for Manju. Through their support, She achieved financial independence and stability, securing a job that allowed her to meet her family's needs and provide for her children's education. Additionally, her resourcefulness shone through as she managed a small farm, supplementing their income and nourishing her family with fresh produce.

Despite her own challenges, Manju's heart of compassion extended to caring for her mother-in-law. Balancing the demands of work, farm, and family, she exemplified the values of love and support that MVDA stood for.

MVDA's impact went beyond providing employment; it became a source of empowerment and a supportive community for Manju. Each opportunity they offered fuelled her confidence, making her stronger and more self-reliant.

Manju Devi's inspiring journey with MVDA proves the indomitable human spirit's ability to overcome adversity. Her story stands as a testament to the life-changing power of empowerment and the unwavering determination of individuals to create a brighter future for themselves and their loved ones.

FROM STUDENT TO EMPOWERING TEACHER

"The journey of a thousand miles begins with a single step, and Aparna's journey from student to teacher is a testament to the power of determination."

Meet Aparna, a determined young girl from Kumrada village and a former learning center student. She worked incredibly hard and with enthusiasm from 2014 to 2016. Today, Aparna is not only an Alumni but also a teacher at MVDA's Community Learning Center at Kumrada, making a significant impact on the lives of our students. Aparna's love for teaching blossomed during her time at our center. In April 2023, when a teaching position became available, she saw it as an opportunity to follow her passion. Her knowledge of the center's programs and her confident interview performance made her the perfect choice. Taking on her new role with enthusiasm, Aparna conducted home visits and engaged students with Academic Initiative kits. Her hard work paid off as the center's attendance soared, and her dedication inspired her students to learn with zeal.

Aparna's journey from student to teacher showcases the transformative power of education. With her commitment and support from the community, she is shaping a brighter future for the children of Kumrada village.

Aparna's success story reminds us that passion and determination can lead to remarkable achievements. As she continues to empower young minds, we are excited about the positive change she will bring to our learning center and community.

SUCCESS STORY

EMPLOYMENT GENERATION

Sunaina Devi, a resident of Amarsar village, lives with her husband, two sons, and her parents. The family's main sources of income is government schemes like MNREGA and agricultural work. Sunaina Devi is skilled in stitching but lacks the technical knowledge to sew men's clothes and faces limited market opportunities in the area.

As part of the HRIDAY program, Women Farmer Groups (WFGs) were formed, and Sunaina Devi, a member of the WFG, learned about livelihood cooperation support. With the help of her Self-Help Group, she received a modern sewing machine to create additional income by sewing at home.

Through this support, Sunaina Devi is expected to become self-reliant through the support provided. She will be liable to economically support her family, and provide better education for her children. She aims to expand her sewing work by learning to sew men's clothes using a modern sewing machine. The program's livelihood promotion activities have the potential to empower more women in remote villages, enabling them to support their families economically.

"With the support of livelihood promotion, now I will help my family to earn more thus I will be able to send my children to a good school."

LANDLESS LABOURER TO ENTREPRENEUR

Lakshmi Devi, 38, is a progressive farmer from Village Nandgaon, Tehri Garhwal, Uttarakhand. She is a landless farmer as, in 2006, during the construction of the Tehri dam, the farmland they used to own was submerged in the lake. Hence, now for her agriculture-related work, she works in the fields of the farmers in the nearby village where they face discrimination, particularly while irrigating the field as the village's residents would cut off the water supply once their own fields are irrigated.

Presently, Lakshmi Devi is also the president of the Kunjapuri Mount Valley Women Farmer Group. She decided to start her own business as the money she was making from farming was not sufficient enough for her personal needs. She expressed interest in starting the Flour Mill (Aata Chakki) & Rice Mill (Dhan Chakki) during the conversation with the MVDA staff. The MVDA staff then helped Lakshmi Devi with the documentation procedure and connected her to the ATMA (Agricultural Technology Management Agency) scheme through convergence, where she was given both the machinery for an 80% (Govt. contribution) and 20% (Right-holder) contribution. Her total contribution for both items of equipment for a total of approximately Rs. 28,000, wherein the total cost of both the machinery was between Rs. 1,00,000 – Rs. 1,20,000.

The farm machinery has brought a significant change in her livelihood & income generation. As, through farming, she was only able to earn Rs.1500-Rs.2000 maximum per season. She also has a separate area in the same space for cosmetics and tailoring adding her to income. Her monthly income from all three businesses is now between Rs. 6000 to Rs. 7000/month which is not only helping her family to live a better life but also, she is also a motivation to other women.

In her words, "I am very happy that now I have started my own business. Farming doesn't earn that much. But ever since I have installed machines and started sewing clothes and keeping cosmetic products, my income is getting better. All I can say is that I can take care of the household expenses and the education of my children."

EDITORIAL COVERAGE

माउंट वैली ने बांटे मासिक धर्म कप

टिहरी के भल्लूवाँव में महिलाओं को वितरित किए मासिक धर्म कप।

नई टिहरी, 6 सितम्बर (स.ह.): माउंट वैली डेवलपमेंट एसोसिएशन की ओर से माहवारी जागरूकता अभियान कार्यक्रम का आयोजन कर 500 ग्रामीण महिलाओं और बालिकाओं को मासिक धर्म कप का वितरण किया गया। कहा कि शरीर स्वच्छ रहने से ही अधिकांश बीमारियों को खत्म किया जा सकता है। मंगलवार को माउंट वैली के स्वयंसेवकों ने डिवाइन प्रो, एलआईसी फाइनस के सहयोग से हृदय परियोजना के अंतर्गत भिलंगना ब्लॉक के भल्लूवाँव, धनरखणी, कफ़ेलागाँव, लसियाल गाँव और गडर गाँव में गोपनीयता का आयोजन कर मासिक धर्म और इससे जुड़ी अवधारणा पर जानकारी दी। उन्होंने ग्रामीण स्तर पर महिलाओं और बालिकाओं को जागरूक किया। डिवाइन प्रो की डा. जूही गंग ने कहा कि मासिक धर्म शारीरिक प्रक्रिया का प्रमुख हिस्सा है। इस मौके पर योगेंद्र, प्रीतभा, दीपक, धीरेन्द्र आदि मौजूद रहे।

मॉडल के जरिए ग्रामीण छात्रों ने दिखाई वैज्ञानिक प्रतिभा

नई टिहरी, 7 मार्च (स.ह.): माउंट वैली एसोसिएशन की ओर से निरालंघन ब्लॉक के 10 गाँवों में 'हृदय' कार्यक्रम संचालित किया जा रहा है। इसके तहत राष्ट्रीय विज्ञान दिवस के उपलक्ष्य में प्राथमिक विद्यालय गडर में विज्ञान प्रदर्शनी आयोजित की गई। प्रदर्शनी में निकटवर्ती 6 स्कूलों के छात्र-छात्राओं ने प्रतिभाग किया। जिनमें प्राथमिक विद्यालय गडर के अलावा गिरडी, लसियाल गाँव, कफ़ेला गाँव, भल्लूवाँव गाँव और धनरखणी शामिल हैं। उन्मुख प्रदर्शित करने वाले छात्र-छात्राओं और उनकी टीमाँ को प्रशंसा पत्र देकर सम्मानित किया गया।

We Extend our Gratitude

Your involvement in our mission can take various forms, such as providing ideas, innovations, skills, knowledge, feedback, volunteering, or making donations. These contributions will greatly assist in advancing our programs aimed at empowering communities in the rural regions of Uttarakhand.

From Management Team

We express our heartfelt gratitude for the incredible support you've provided. Your guidance and encouragement have paved the way for exciting opportunities ahead. With your expertise lighting the path, we are truly excited to embark on this collaborative journey.
